## Brief Instructions: Functional Test Detector group and extinguishment group

### Note

Authorisation level 2 is the minimum level required for carrying out a functional test.

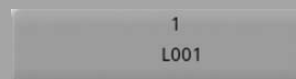

- 1 Press the button “Settings”.

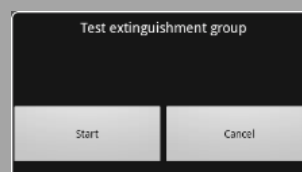

- 2 In the menu “Switching off / Function test”, select the menu option that is to be tested:  
“Test detector group”  
“Test extinguishment group”

- 3 Select the sub-zone to be tested.

- 4 In the display, click the “Start” button.

- 5 The test is ended automatically.  
A symbol on the button indicates the progress of the test.
